Farm Equipment Buyers Trust The Name Meyer!

REAR ATTACHMENT OPTIONS:
ALL 3 ATTACHMENTS ARE DIRECT DRIVEN
 (except semi-trailer mounted)
TO MAINTAIN CONSISTENT SPREAD PATTERNS BEGINNING TO END
No Hydraulic Stalls or Variations in Rate!

S-100
 < Combination Design of 2 horizontal beaters with lower spinner disks to disperse material. Patterns will be low and wide – up to 65'. Ideal for litter, compost and digester solids, capable of handling bedding pack and lime products. (Guillotine tailgate standard, swing arm opt.)

S-200
 < Massive, Dual Vertical Expellers (44" diameter) creating an explosive 30-40 foot pattern. Versatile due to its ability to handle most types of manure, sludge and compost including frozen, dry feedlot and packed manure! (Swing arm tailgate standard w/belting deflector kit)

S-300
 < A conventional Horizontal Beater Design with 3 or 4 beaters. Capable of handling most materials with a consistent pattern about 9-12' wide. Standard 4th beater eliminates chunks falling off the aprons. (Swing arm tailgate standard)

ALL ATTACHMENTS ARE EASILY REMOVABLE AND INTERCHANGABLE!

The Swing Arm Style Tailgate also features a Bypass Valve for your protection. The apron will not operate until the tailgate is in the fully open position. This feature protects your spreader and limits the hydraulic outlet requirements on your tractor!

The PTO Driveline features a standard constant velocity - 1 3/4" 20 spline yoke, over-running clutch and torque disconnect clutch to protect your expeller drive system. The pto bearing tower is rubber mounted to reduce vibration.

Solid-poly floor with Triple 667XH Aprons – 180,000# combined tensile! **Variable Speed Apron Drive** is Standard on all Models!

Massive formed channel floor supports. Only 7" gap between supporting crossmembers!

9524 pictured with XTSW3000 Trailer
 XTSW 3000 features a sliding axle system to match drawbar weight and maneuverability when converting to silage box.

Silage Extension Package
 Adds 36" additional height

*utilizes spreader tailgate when equipped with swing-arm tailgate.
 *top pivot rear door available for spreaders equipped with guillotine gate.
 (pictured with non-current eyebrow fenders)

This Belting Deflector is standard equipment with the swing arm tailgate. It reduces kickback of rocks and frozen manure when using the vertical attachment.

Hinged Stake System for easy attachment removal. As you lift on the upper lift tabs, the attachment hinges out and lifts out of the stakes.

High-Efficiency Berma 800 Series apron gearbox to pull the load. This gear-to-gear design is simple and strong! It is outfitted with the Meyer Hydraulic Variable Speed Control.

Massive Expeller Driveline features a center drive design for reduced stress. (S-100 / S-200)
 Massive bevel gearbox design makes others look small!

Attachment Driveline
 No-Tool disconnection!
 Unhooks just like a tractor PTO.

9524 Truck Mount w/Silage Conversion
 The "Crop Max" offers versatility and capacity the others just can't match!

Contact factory for truck requirements

XTSW4500 – 45 ton Tridem – Steerable

Wide-Track Suspension Style Trailers
 XTSW2400 / 3000 / 4500 – 24, 30, 45 Ton Capacity
 Spring Suspensions – All Models / Oil Bath Hubs - XTSW2400 & 3000
 Tire options include 600/50, 700/40 floatation or dual/single Truck Style
 Sliding Axle System standard on XTSW3000
 Fixed on XTSW2400 & 4500

XTSW3000 – 30 ton Tandem w/Slider

Articulating Implement Hitch
 Standard Equipment on XTS trailers.
 Pivots with your drawbar to minimize wear and stress!
 Requires hammerstrap drawbar w/1.5 or 2" pin.

Scale Packages Available Maximize the Value of Your Material
 6 and 8 point models depending on box size. Load cells mounted between box and chassis for accurate performance.
Nutrient Tracking Management System
 with on-the-go application rates and GPS coordinate data.
 Also Available – Hydraulic Speed Sensor Port for Variable Rate Applications! (Optional)
